### Sustainability at TPK

We are committed to sustainability and are constantly working to optimize our Techpark in its entirety.

### We introduce

- New tenant: valantic Telco Solutions & Services GmbH

### element-i Bildungshaus: Grammar school starts

Since 2019, the carrier network Konzept-e has been pursuing the vision of enabling seamless learning with the opening of the element-i Bildungshaus in Karlsruhe. In addition to the kindergarten, primary school and community school, it will now also be possible from the school year 2023/24 to graduate with A level.

### What else...

#### Event of the Welcome Center TechnologieRegion Karlsruhe

The Welcome Center TechnologieRegion Karlsruhe organizes a business breakfast on Thursday, February 9, 2023 and cordially invites everyone who's interested to join.

## Sustainability at TPK

Technologiepark Karlsruhe GmbH has been investing and engaging for years in various sustainability projects in order to implement and apply ecological, social and economic aspects in the sense of current progress and understanding. One of these projects is the **"TPK Bees" project** in cooperation with BZV KA e.V.. We would like to remind you that interested parties from companies in the Technologiepark Karlsruhe are cordially invited to participate. Further information and details on the "TPK Bees" project can be obtained from [tpk@techpark.de](mailto:tpk@techpark.de). We look forward to your interested replies.

## New tenant: valantic Telco Solutions & Services GmbH

**valantic**

**valantic Telco Solutions & Services GmbH** is the IT service provider for the digitization of TKG (Telecommunications act) requirements. **valantic** offers a comprehensive range of services from operation to takeover of TKG business processes. The vertical range of manufacture and the scope of services are freely selectable, depending on the operational conditions. The aim is to optimize resources in order to be able to focus on the core business.

## element-i Bildungshaus: Grammar school starts

In the school year 2023/24, the carrier network Konzept-e starts the beginning of the Grammar school and now offers seamless learning from kindergarten to A level in the element-i Bildungshaus. Since the opening of the private educational institution in 2019, the project was already aimed at and follows the proven element-i educational philosophy. This is based on the motto "Learning today what is important tomorrow" and focuses on competences such as personal responsibility, self-organization, creativity, technical understanding, tolerance of change and resilience, which are taught in addition to the learning material of the state of Baden-Württemberg curriculum. Firmly anchored in the curriculum is a focus on the STEM subjects and foreign-language teaching units, which are taught in phases in French, English and possibly in Spanish, as well as project-oriented phases.

For the coming school year, Wednesday, February 15 is the registration deadline for interested and qualified students to be added to the waiting list. All further information on the educational philosophy and admission process can be found on the element-i website under [www.element-i.de](http://www.element-i.de)
